- UI/UX design (Figma, Adobe)
- Wordpress

Backend :

- PHP
- My SQL
- RESTful APIs
- CURL

Version Control:

- Git

OBJECTIVE

I'm a detail-oriented Full Stack Web Developer skilled in creating and deploying dynamic web applications. Seeking to apply my expertise in both front-end and back-end development at an innovative tech company. Dedicated to contributing to collaborative teams and advancing cutting-edge projects.

EDUCATION

- **2021 – 2023**
Master of Computer Applications
Percentage: 80%
Hindustan College of Engineering and Technology
- **2018 – 2021**
Bachelor of Computer Applications
Percentage: 79%
Government Arts College
- **2017 – 2018**
HSC
Percentage: 83%
Thanappa Gounder Mat. Hr. Sec. School
- **2015 – 2016**
SSLC
Percentage: 91%
Government High School

EXPERIENCE

- **EssEmm Technologies** Jan 2023 – Present
Product: Office Integrated Management System (OIMS)
Junior Developer
 - Developed responsive web applications using HTML, CSS, JavaScript (including jQuery).
 - Integrated third-party APIs and implemented AJAX requests to enhance user interactivity.
 - Designed and maintained backend functionalities using PHP and MySQL. Collaborated with team members to troubleshoot and resolve technical issues.
 - Contributed to the development and optimization of database structures for improved performance.

PROJECTS

1. Module Engineering for OIMS

- Developed and enhanced various modules within the OIMS ERP system to streamline office management processes.
- Used HTML, CSS, JavaScript, jQuery, PHP, MySQL, AJAX, and RESTful APIs to design user-friendly interfaces, integrate backend functionalities, and ensure responsiveness

2. UI/UX Development for Web Applications

- Collaborated with the design team to create intuitive and engaging user interfaces for web applications.
- Translated design prototypes from Figma and Adobe XD into functional web pages, conducted usability testing, and optimized user experience for better accessibility.

3. Report Generation System

- Developed a comprehensive reporting module for generating various reports within OIMS.
- Designed report templates, automated report generation and distribution, and created interactive charts and graphs using HTML, CSS, JavaScript, PHP, MySQL, and jQuery.

4. Service Application Integration

- Developed web applications to integrate with third-party services for enhanced functionality.
- Implemented API integrations using CURL and RESTful APIs, ensuring secure data transmission and error handling.

5. API Handling and Management

- Managed and developed RESTful APIs for various OIMS functionalities.
- Designed and documented API endpoints, implemented server-side logic, and ensured API security and performance optimization.

6. Website Development using WordPress

- Created and maintained websites using WordPress for various clients.
- Customized WordPress themes and plugins, implemented responsive design and SEO best practices, and provided ongoing maintenance and updates.

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge and belief. I am confident that my skills and experiences will significantly contribute to the success of any organization I work with.
